

Overall

- GSE already serving large % of GMES User organizations (20-80%)
- Good (excellent) correspondence GSE-FTS/Pilots
 - **Portfolio – FTS**
 - **Service – parameters/products**
 - **Documented**
- GSE Services respond to user needs
- User Engagement is substantial
- Practical proposals for end-to-end demonstrators
 - **linking core – GSE downstream (users)**

Key issues

- **Polar-view: Significant asset for GMES & GEOSS**
 - International cooperation, Climate Change adaptation
 - **Solution for continuity needed**
- **Maritime Security**
 - Consolidation only
 - **Need to ensure scaling-up** while GMES Security matures
- **Food Security: Handle with Care**
- **Critical issue all Users: Continued Service Delivery**
 - Maintaining user dialogue & service networks
- **Schedule for transition GSE to Fast Track**
 - Risk of service discontinuities & gaps is REAL
 - **Measures needed to smooth this transition**
- **Need for GSE Users & providers to **access GMES data (service)****
 - GMES Space Component
 - FP7
- **Preserve the formal user provider relation: SLA**
- **Availability of **operational budget for GMES service DELIVERY****
