

As part of its Opening Celebrations the

Victorian Space Science Education Centre

Invites all teachers to tour the Centre and meet the VSSEC team on

Thursday 20th July 4:00 – 6:00

VSSEC offers a world class facility for the teaching of science, and provides an innovative resource for Victorian teachers. VSSEC offers exciting and engaging educational programs for students, and supports continuous teacher professional development.

Teachers are invited to tour the **Simulated Planetary Surface, Space Laboratory, and Mission Control**, which will be the focus of VSSEC's two scenario based programs, *Mission to Mars* and *Mission to the Space Laboratory* for years 9-10.

Rigorous scientific investigation is an integral part of all VSSEC's programs from Year 7 to VCE. Students will have access to the latest equipment in our research standard **Laboratory**, including the latest Varian analytical instruments.

Another unique feature of VSSEC is the Massimo Room, named for Massimo Bandecchi, head of the Concurrent Design Facility (CDF) at the European Space Agency, which has streamlined space mission design. VSSEC has adapted this technology to streamline curriculum design.

Please join us to explore this unique facility and celebrate its opening. Light refreshments will be provided.

RSVP: To assist with catering please express your intention to attend by emailing bookings@vssec.vic.edu.au
