

SOS2 Resources

'A Pollutant's Tale' Lecture Demonstration

Presented by Dudley Shallcross and Tim Harrison
(Bristol ChemLabS, University of Bristol, UK)

Additional information concerning the topic of atmospheric chemistry and some of the practicals undertaken may be found at the School of Chemistry, University of Bristol's Outreach Website: www.chemlabs.bristol.ac.uk/outreach/

For details of some of the practical work please see:

www.chemlabs.bristol.ac.uk/outreach/chemnet/Chemnet_resources/Experiments_with_Carbon_Dioxide.pdf

For a simple mathematical model of the atmosphere with respect to greenhouse gases, distance from the Sun and temperature please see:

www.chm.bris.ac.uk/acrg/model/simple_climate_model/prediction_model.html

For detailed notes on aspects of ozone depletion and climate change please see:

www.chemlabs.bristol.ac.uk/outreach/resources/Atmos.html
